## DETAILED ACTION

### Allowable Subject Matter

1. Claims 1-32, 34-38, and 46-47 are allowed.

#### *Examiner's Statement of Reason for Allowance*

2. The following is an examiner's statement of reasons for allowance for all claims:

**Re claims 1, 16, 18, 34, and 46.** The prior art fails to teach, or suggest, the limitations of: a method for electronic trading of interests over at least one network by a system including at least one computer, the method comprising: the at least one computer receiving over the at least one network an order for an interest comprising terms for a trade of a total desired quantity of the interest, the terms comprising an identification of the interest, an initial price, an initial quantity, and a reserve quantity, the total desired quantity being equal to a sum of the initial quantity and the reserve quantity; based on the received order, the at least one computer providing for disclosure to potential counterparties over the at least one network terms for a first proposed trade of the interest, the terms for the first proposed trade comprising an identification of the interest, the initial price, and the initial quantity; the at least one computer, after acceptance of the first proposed trade for all or part of the initial quantity, providing for disclosure to potential counterparties over the at least one network terms of a second proposed trade of the interest, the terms for the second proposed trade comprising an identification of the interest, a second price, and a second quantity, the second price being equal to the initial price changed by a reserve price change associated with the order, and the second quantity comprising at least a portion of the reserve quantity; and prior to the

acceptance of the first proposed trade, the at least one computer not providing for disclosure to potential counterparties over the at least one network of any portion of the reserve quantity. The closest prior art, is also **the best U.S art**: Kalmus et al (US PAT: 4,674,044), discloses a data processing system for an automated trading market for one or more securities. The system retrieves the best obtaining bid and asked prices from a remote data base, covering the ensemble of institutions or others making a market for the relevant securities. Data characterizing each securities buy/sell order requested by a customer is supplied to the system. The order is qualified for execution by comparing its specifics against predetermined stored parameters. The stored parameters include the operative bid and asked prices, the amount of stock available for customer purchase or sale, and maximum single order size (see the abstract). Kalmus describes a situation where a trader's unqualified order may be qualified by the system after a favorable change in the insider market price of the security. (Col. 5, lines 15-20). That is to say, following a change in the market price, the system reviews all non-executable orders stored in memory to determine whether the orders have become qualified (Col. 5, lines 35-44). If a previously unexecuted order is qualified by the system in Kalmus, the initial order having the same, initial price term is disclosed to other users, there is no change in the price. In Kalmus, an order specifies a single quantity, and the entire quantity of an initial order entered by a user is disclosed to other users so long as the price term is within a predetermined range. An order having a price above the predetermined range will remain undisclosed unless it becomes qualified at a later date. Although the user may change the quantity term of an unqualified order after the unqualified order

becomes qualified in Kalmus, the order is not divided into portions for trading, neither prior to nor after the quantity is changed. Therefore, neither the executed order nor the unexecuted order described in Kalmus constitutes a portion of the full size of the intended trade to the market. As such, Kalmus does not teach or suggest an order that includes a reserve. No order discussed in Kalmus includes a disclosed portion (an initial quantity) and an undisclosed portion (a reserve quantity).

Updated searches revealed no references that disclosed the claimed inventions, nor were any secondary references identified which could be reasonably combined with Kalmus. The drawings submitted on 04/20/01 are acceptable. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
